

Anchor Kits

Installation Guide for Turbidity Curtains

BMP Turbidity Curtains are designed with a positioning/connector eye bolt in the connector plate every 50'. Should an anchor system be desired, a BMP anchor kit contains all the necessary components for most applications. Use this guide to help with the installation.

Making sure that you have the right one for your project's specific needs is important. Contact us for assistance (1.855.422.0066)

- **ANCHOR BUOY:** Acts as a buffer between the anchor and turbidity curtain, preventing sudden stress from waves, currents, or wind.
- **POSITIONING/RETRIEVAL BUOY:** Ensures precise curtain placement, easy installation, and hassle-free anchor removal.
- **DANFORTH-TYPE ANCHOR:** Features wide flukes for maximum holding power and a welded crown for secure penetration. A drilled pivot point allows easy attachment of the retrieval line for quick dislodging at project completion.
- **ANCHOR RODE CHAIN:** Maintains the correct anchor angle for optimal bottom penetration.
- **BMP ANCHOR KIT:** Includes high-quality lines, thimbles, and carabiners for secure anchoring and peak curtain performance.

INSTRUCTIONS

- Attach the 12" anchor buoy to the bridle line, then clip the other end to the eye bolt on the turbidity curtain's connector plate.
- Clip the carabiner of the anchor line to the anchor rode chain and tie the other end to the 12" anchor buoy at the desired length.
- Clip the positioning/retrieval line to the retrieval point on the anchor.
- Slowly back the boat away from the curtain while releasing the anchor line. Lower the anchor over the side, guiding it down with the retrieval line, until it rests on the bottom.
- Tie the retrieval line to the 9" retrieval buoy, ensuring it floats near the anchor for easy access.

TO REMOVE AN ANCHOR

Grab the retrieval buoy, pull up the retrieval line to dislodge the anchor, then retrieve all components and detach them from the curtain.

WHATS IN A BMP ANCHOR KIT

- 1- Anchor (14lbs, 25lbs, or 40lbs)
- 1- Chain
- 1- Rope
- 2- Shackles
- 2- Buoys
